

HOMEOPATHY

PATIENT CHOICE

According to NHS England's website, "Patient choice is at the heart of the NHS." Yet NHS England is now proposing to deny patients the only natural health choices in treatment they can receive.

NATURAL AND SAFE

When used appropriately natural therapies are extremely safe, producing very few side-effects. Costs in the NHS for adverse drug reactions are estimated at £466 million - more natural treatments are needed not less.

SAVES MONEY

£££

Homeopathy helps the NHS's spiralling drugs' bill and removing it will only increase prescription costs. Doctors in the UK, and throughout Europe, who practice homeopathy have reported lower prescribing costs.

PATIENTS ARE HAPPY

70%

A study of 6,544 chronically ill patients conducted at the NHS Bristol Homeopathic Hospital found 70% reported positive health changes following treatment.

EVIDENCE BASED

Homeopathy is effective for treating both acute and chronic disease. Claims that there is no quality evidence supporting homeopathy as an effective treatment are false, the majority of systematic reviews of homeopathy demonstrate it is more than a placebo.

CLINICAL EXPERTISE

400

Approximately 400 NHS doctors trained in herbal medicine, homeopathy and other natural therapies regularly see the health benefits in the patients they treat.

VULNERABLE PATIENTS

Many patients receiving homeopathy on the NHS have failed to respond to conventional treatments. These vulnerable patients will suffer if NHS England cuts the care they are receiving.

THIN END OF WEDGE

These proposed cuts are not just about homeopathic medicines. They herald the end of most Complementary therapies on the NHS. Once these NHS services disappear they are gone for good. Fight these cuts and save the NHS money and patient choice!

SAVE NHS SERVICES

To save these valuable health services ACT NOW! Visit www.4homeopathy.org to see how YOU can help.

BULLYING TACTICS

A small group of activists are campaigning to deprive YOU of choice in NHS treatments. DON'T LET THEM WIN!
